

The background of the cover is a high-magnification electron micrograph showing numerous spherical nanoparticles. The particles are arranged in a somewhat regular, hexagonal-like lattice, typical of a crystalline structure. The color of the particles varies from a light pinkish-red to a dark, almost black, depending on their size and the way they are illuminated. The overall appearance is that of a dense, ordered array of small, round objects.

Contents

<i>Preface</i>	xv
1. Definition and Standardization of Nanomaterials	1
<i>Georg Reiners</i>	
1.1 Introduction	1
1.1.1 General Meaning of Standards	1
1.1.2 History of International Standardization in Nanotechnologies	3
1.1.3 Importance of the Definition of the Term Nanomaterial	4
1.1.4 Definition of “Nanoscale”	5
1.2 Organisation of Nanotechnology Standardization	6
1.2.1 ISO/TC 229 Nanotechnologies	7
1.2.2 IEC/TC 113 Nanotechnologies Standardization for Electrical and Electronic Products and Systems	8
1.2.3 <i>Cooperation between ISO and OECD</i>	8
1.2.4 CEN/TC 352 Nanotechnologies	9
1.3 Nanomaterial Standardisation: <i>Status Quo</i>	10
1.3.1 Terminology Standards	10
1.3.1.1 Core terms	10
1.3.1.2 Nanomaterial	11
1.3.1.3 Nano-objects and carbon nano- objects	12
1.3.1.4 Nanostructured material	14
1.3.1.5 Other nanomaterial definitions for regulative purposes	16
1.3.1.6 REACH and standardization	19
1.3.2 Measurement and Characterization Standards	20
1.3.3 Reference Materials	22
1.3.4 Environment, Health, and Safety (EHS) Standards	23
1.3.5 Materials Specification Standards	24
1.4 Conclusion and Outlook	25

2. Industrial Relevant Production Processes for Nanomaterials and Nanostructures 29

Karl-Heinz Haas

2.1	Types of Nanomaterials/Nanostructures	29
2.2	General Production Process Types	31
2.3	Classical Nanomaterials: Carbon Black and Silica	34
2.4	Top-Down Approaches	34
	2.4.1 High-Energy Milling	35
	2.4.2 Electrospinning	37
2.5	Bottom-Up Approaches	37
	2.5.1 Liquid Phase Processing	37
	2.5.1.1 Precipitation	39
	2.5.1.2 Sol-gel processing	39
	2.5.1.3 Solvo-/hydrothermal treatment	40
	2.5.1.4 Polymers for controlled nanostructures	41
	2.5.1.5 Emerging use of ultrasound	42
	2.5.2 Gas Phase Processes	42
	2.5.2.1 Inert gas condensation	42
	2.5.2.2 Plasma-assisted synthesis	42
	2.5.2.3 Chemical vapor deposition	43
	2.5.2.4 Flame synthesis	45
	2.5.2.5 Spray pyrolysis	46
2.6	Conclusions: Processes, Production Volumes and Sustainability	46

3. Economic Impact and Applications of Nanomaterials 63

Wolfgang Luther and Axel Zweck

3.1	Introduction	63
3.2	Tailoring Material Properties at the Nanoscale	64
3.3	Industrial Use and Commercial Relevance of Nanomaterials	69
	3.3.1 Assessment of Production and Market Volume of Nanomaterials	73
	3.3.1.1 Market volume	73
	3.3.1.2 Production volume	77
	3.3.1.3 Economic leverage effect of nanomaterials	80

3.3.2	Applications of Nanomaterials in Different Industrial Sectors	81
3.3.2.1	Chemistry	82
3.3.2.2	Medicine	83
3.3.2.3	Energy	84
3.3.2.4	Environmental technology	85
3.3.2.5	Optics/photonics	86
3.3.2.6	Mechanical engineering	86
3.3.2.7	Civil engineering	87
3.3.2.8	Automotive	88
3.3.2.9	Information and communication	88
3.3.2.10	Consumer goods	89
3.4	Summary and Outlook	91
4.	Engineered Nanoparticle Release, Exposure Pathway and Dose, Measures and Measuring Techniques for Nanoparticle Exposure in Air	99
	<i>Heinz Fijßan and Hans-Georg Horn</i>	
4.1	Introduction	99
4.2	ENP Release into Air	101
4.3	ENP Exposure Pathway in Air and Dose	109
4.4	Relevant Measures	112
4.5	Concentration Measurement Techniques	115
4.5.1	Near Real-Time Measurement Techniques for Total Concentration	117
4.5.2	<i>Property-Resolving Near Real-Time</i> Measurement Techniques	119
4.5.3	Combining the Measurement of Total Concentration with Size-Selective Pre- Separators	122
4.6	Exposure Measurements	123
4.7	Conclusions and Outlook	127
5.	Ecotoxicological Aspects of Nanomaterials in the Aquatic Environment	135
	<i>Kristin Schirmer, Renata Behra, Laura Sigg, and Marc J.-F. Suter</i>	
5.1	Introduction	135
5.2	Fate in the Aquatic Environment	137

5.3	Fate in Model Ecosystems	139
5.4	Routes and Mechanisms of Uptake into Aquatic Organisms	140
	5.4.1 Uptake Routes	141
	5.4.2 Mechanisms of Uptake	143
5.5	Nanoparticle–Biomolecule Interactions	144
	5.5.1 Biologically Induced Transformation of Nanoparticles	145
	5.5.2 Nanoparticle-Induced Changes to Biological Target Sites	146
5.6	Research Needs	147
6.	Biological Responses to Nanoparticles	157
	<i>R. Zellner, J. Blechinger, C. Bräuchle, I. Hilger, A. Janshoff, J. Lademann, V. Mailänder, M. C. Meinke, G. U. Nienhaus, A. Patzelt, F. Rancan, B. Rothen-Rutishauser, R. H. Stauber, A. A. Torrano, L. Treuel, and A. Vogt</i>	
6.1	Introduction	158
6.2	Interactions of Nanoparticles with Proteins	161
	6.2.1 Dependence on Particle Size	162
	6.2.2 Binding Affinities	163
	6.2.3 Dependence on Surface Functionalization	166
6.3	Transfer of Nanoparticles Across Membranes and Cellular Uptake Mechanisms	167
	6.3.1 Endocytosis	169
	6.3.2 Nanoparticle Entry into Cells	173
6.4	Trafficking and Intracellular Distribution of Nanoparticles	175
	6.4.1 Particle Dynamics	175
	6.4.2 Fractional Particle Uptake	176
	6.4.3 Subcellular Distribution of Nanoparticles	179
6.5	Impact of Nanoparticles on Biological Functions	180
	6.5.1 Interactions of Nanoparticles with Cells	181
	6.5.2 Impact of Gold NPs on Cells	184
	6.5.3 Impact of Semiconductor Quantum Dots on Cells	186

6.6	Uptake of Nanoparticles by the Lung	186
6.6.1	Nanotoxicological Dynamics and Kinetics	189
6.6.2	Cell Culture Models of the Human Epithelial Airway and Alveolar Barrier	190
6.7	Interaction of Nanoparticles with the Skin	192
6.7.1	Follicular Penetration: A Phenomenon of Open and Closed Hair Follicles	193
6.7.2	Follicular Reservoir for Particulate Substances	193
6.7.3	Dependence of Particle Penetration on the Particle Size	194
6.7.4	Transfollicular Penetration of Particulate Substances	197
6.8	Conclusions	199
7.	Health Hazards of Nanomaterials: Anxiety versus Science	219
	<i>Thomas Gebel</i>	
7.1	Introduction	219
7.2	Scope of This Chapter	220
7.3	Possible Toxicological Modes of Action and Approaches for Grouping	222
7.4	Distribution and Retention of Nanomaterials in the Body	222
7.5	Relevant Health Hazards	224
7.5.1	When Chemical Toxicity Is Determinant a Nanomaterial-Specific Evaluation Is Needed	225
7.5.2	Does the Fibre Principle Apply?	226
7.5.3	Relevant Health Hazards for GBP Nanomaterials	227
7.6	Conclusion	229
8.	Nanomaterials at the Workplace: Occupational Safety and Health	235
	<i>Rolf Packroff and Miriam Baron</i>	
8.1	The Regulatory Framework for a Safe Handling of Nanomaterials at the Workplace	235
8.1.1	Chemical Safety	235

8.1.1.1	Classification and labeling (CLP)	238
8.1.1.2	REACH	240
8.1.1.3	Safety data sheet	242
8.1.2	Occupational Safety and Health	244
8.1.2.1	EU minimum standards	244
8.1.2.2	EU precautionary approach	245
8.1.2.3	Germany: Hazardous Substances Ordinance (GefStoffV)	246
8.1.2.4	Germany: Technical Rules for Hazardous Substances (TRGS)	246
8.1.2.5	Control banding	247
8.2	Practical Aspects of Occupational Safety and Health for Nanomaterials	249
8.2.1	Gathering Information	249
8.2.2	Risk Assessment	250
8.2.3	Control Strategies	250
9.	International Activities on Nanosafety: OECD Working Party on Manufactured Nanomaterials	259
	<i>Klaus Günter Steinhäuser</i>	
9.1	Introduction	259
9.2	Mandate and Objectives of OECD WPMN	261
9.3	Projects of the OECD Working Party on Nanomaterials	261
9.3.1	Safety Testing of a Representative Set of Manufactured Nanomaterials	261
9.3.2	Manufactured Nanomaterials and Test Guidelines	267
9.3.3	The Role of Alternative Methods in Nanotoxicology	268
9.3.4	OECD Database on Manufactured Nanomaterials to Inform and Analyse EHS Activities	269
9.3.5	Exposure Measurement and Exposure Mitigation	271
9.3.6	Risk Assessment	272
9.3.7	Voluntary Schemes and Regulatory Programmes	273

9.3.8	Environmentally Sustainable Use of Manufactured Nanomaterials	274
9.4	Conclusions	275
10.	Chances of Nanomaterials for Pharmaceutical Applications	279
	<i>Loretz Brigitta, Jain Ratnesh, Dandekar Prajakta, Thiele Carolin, Yamada Hiroe, Mostaghaci Babak, Lian Qiong, and Lehr Claus Michael</i>	
10.1	Introduction	279
10.2	Therapeutic Needs and Opportunities for Nanopharmaceuticals	281
10.2.1	<i>Delivery of Small-Molecule Drugs</i>	281
10.2.2	Macromolecular Biopharmaceuticals	283
10.2.2.1	Proteins, peptides	283
10.2.2.2	Nucleic acids	285
10.2.3	Drugs that Need Efficient Targeting	286
10.2.3.1	“Nano-oncology”	286
10.2.3.2	Drug delivery over the blood–brain barrier	287
10.2.3.3	Autoimmune diseases	288
10.2.3.4	Vaccination	289
10.3	Current Arsenal of Nanocarriers	290
10.4	Translation of Nanopharmaceuticals into Clinics	293
10.4.1	Approved Nanopharmaceuticals	293
10.4.2	Nanopharmaceuticals Currently in Clinical Trials	293
10.4.3	Upcoming Technologies	295
10.4.3.1	Nanoparticle-based technologies	295
10.4.3.2	Nanoemulsion-based technologies	297
10.4.3.3	Micelle-based technologies	298
10.4.3.4	Liposome-based technologies	298
10.4.3.5	Dendrimer-based technologies	298
10.4.3.6	Cationic nanoparticles for nucleic acid delivery	299
10.4.4	Requirements/Needed Support	299

10.4.4.1	Social and ethical requirements	300
10.4.4.2	Regulatory requirements	300
10.4.4.3	Technological and industrial requirements	301
10.5	Challenges for Developing Future Nanopharmaceuticals	302
10.5.1	New Materials	302
10.5.1.1	Biodegradability	302
10.5.1.2	Multifunctional, smart polymers	303
10.5.1.3	Mimicing biological structures	304
10.5.2	<i>In silico</i> Approaches and Databases	305
10.5.3	Ensuring Quality of Nanopharmaceuticals	305
10.5.3.1	Characterization techniques	306
10.5.3.2	Reproducibility and scale-up	306
10.5.3.3	Sterilization methods	306
10.5.3.4	Quality control and quality assurance	307
10.6	Conclusions and Perspective	307
11.	Sustainability Assessment of Nanoproducts	319
	<i>Martin Möller</i>	
11.1	Introduction	320
11.2	PROSA as Methodological Background	322
11.3	Life-Cycle Thinking and Systemic Approach	325
11.4	Key Performance Indicators	326
11.5	Nano-SWOT Matrix and Strategic Optimization	329
11.6	Case Studies	331
11.6.1	Case Study: pro.Glass® Barrier 401	331
11.6.2	Case Study: X-SEED®	333
11.7	Proposed Areas of Application, Strengths and Limitations of the Tool	336
12.	Risk Perception and Risk Communication on the Issue of Nanotechnology	341
	<i>Gaby-Fleur Böl, Guido Correia Carreira, Astrid Epp, Eva Häffner, and Mark Lohmann</i>	

12.1	Introduction	341
12.2	Risk Perception of Nanotechnology: Differences between Experts and Laypeople	344
12.2.1	Risk Perception of Nanotechnology among Laypeople	344
12.2.2	Risk Perception of Nanotechnology among Experts	346
12.3	The Role of the Media in the Perception of Nanotechnology Risks	348
12.4	Citizen Involvement and Participation	352
12.4.1	Citizens as Stakeholders in Risk Communication	352
12.4.2	Citizen Involvement in Risk Communication on Nanotechnology	355
12.5	Risk Communication on New Technologies: Best Practice	360
12.5.1	Fundamental Aspects of Risk Communication	360
12.5.2	Special Characteristics of Risk Communication in the Case of Nanotechnology	363
12.5.3	Participatory Risk Communication	364
12.5.4	The Challenge of the Media	367
12.5.5	Conclusion	368
