The background of the cover is a large-scale fluorescence microscopy image of neural stem cells. The cells are stained with three different dyes: green, blue, and red. The green staining highlights the extensive network of cell processes and filaments. The blue staining marks the nuclei of the cells. The red staining is more localized, appearing in some cell bodies and processes. The overall appearance is a dense, interconnected web of cells against a dark background.

# Table of Contents

Contributors	xv
Preface	xix
<b>1 Neural Differentiation of Pluripotent Stem Cells</b>	<b>1</b>
<i>Mohan C. Vemuri</i>	
1.1 Introduction	1
1.2 NSC Derivation from Rosette Formation of Embryoid Bodies	1
1.3 Rosette Free NSC in a Monolayer Culture	2
1.4 Pathways Involved in Neural Tube and Neural Crest Lineages	2
1.5 Differentiation and Gene Expression in Human Brain Development	3
1.5.1 Differentiation to Forebrain Neurons from Pluripotent Stem Cells	3
1.5.2 Differentiation to Midbrain Dopaminergic Neurons from Pluripotent Stem Cells	4
1.5.3 Differentiation to Motor Neurons from Human Pluripotent Stem Cells	5
1.6 Conclusions	6
References	6
<b>2 The History and Design of Assays for the Identification and Characterization of Neural Stem Cells</b>	<b>9</b>
<i>Sharon A. Louis and Brent A. Reynolds</i>	
2.1 Introduction	9
2.1.1 Stem Cells	9
2.1.2 Stem Cells in the Central Nervous System	10
2.1.3 The Neurosphere Assay	11
2.2 Materials	12
2.2.1 General Equipment	12
2.2.2 Tissue Culture Equipment (Neurosphere Culture)	12
2.2.3 Media, Supplements and Associated Reagents for Neurosphere Cultures	13
2.2.4 Media, Supplements, and Tissue Culture Equipment for Neural Colony Forming Cell Assay	13
2.3 Methods	14
2.3.1 Neurosphere Cultures from Primary Embryonic or Adult CNS Tissues	14
2.3.2 Neural Colony Forming Cell (NCFC) Assay for Enumerating Neural Stem Cells and Neural Progenitor Cells	18
2.3.3 Categorizing NCFC Colonies and Scoring NCFC Colonies	20
2.3.4 Application of the NCFC Assay for Estimation of NSCs or Neural Progenitors	21
2.4 Notes	21
Acknowledgments	23
