CONTENTS

CHAPTER 1

BRIEF DESCRIPTION OF THE NATURE OF THE MÖSSBAUER EFFECT

	1
1.1. Introduction	1
1.2. The nature and probability of the Mössbauer effect	4
1.3. Effects of displacement and splitting of the lines. Parameters of Mössbauer spectra	9
1.4. The width of the resonance line	17
1.5. The structure of resonance absorption curves of non-ideal crystals	18

CHAPTER 2

INTERPRETATION OF MÖSSBAUER SPECTRA OF ALLOYS

	22
2.1. Preliminary comments	22
2.2. Non-equivalent positions of resonant nuclei	23
2.3. The superposition principle	25
2.4. Generalised form of the resonance absorption curve	30

CHAPTER 3

ELECTRICAL AND MAGNETIC HYPERFINE INTERACTIONS OF RESONANT NUCLEI IN METALS AND ALLOYS

	34
3.1. General considerations	34
3.2. Experimental data on the perturbation of the charge and spin density in crystals of transition metals in dissolution of impurities	38
3.3. Ferromagnetic impurity crystals based on transition metals	43
3.3.1. <i>Analysis of the role of different mechanisms in the formation of H_f on atom nuclei</i>	45
3.3.2. <i>Statistical fluctuations of the local environment</i>	50
3.3.3. <i>Method of determination of atomic magnetic moments on the basis of measure- ments of magnetisation and H_f</i>	52
3.3.4. <i>Calculation of nodal magnetic moments for iron alloys with different impurities. Comparison with neutron diffraction data</i>	53
3.3.5. <i>Physical meaning of partial contributions to H_{ef}</i>	57
3.4. Hyperfine structure of Mössbauer spectra of diluted iron-based solid solutions	58
3.5. Antiferromagnetics and non-collinear magnetics	62

CHAPTER 4

STRUCTURE OF MÖSSBAUER SPECTRA OF ALLOYS WITH LONG-RANGE AND SHORT-RANGE ATOMIC ORDER

	63
4.1. On specific of information obtained in connection with the local-nuclear nature of the method	64
4.2. On determination of the order parameters	68
4.3. Variation of integral intensities of spectra components in the formation of short-range and long-range atomic order in substitutional solid solutions	69
4.4. Accounting for the effect of remote coordination spheres in the presence of	

atomic order	75
4.5. Relationship of the mean value of the effective magnetic field with the parameters of the long-range and short-range atomic order	79
4.6. On experimental determination of the value of the mean field	82
4.7. Analytical description of the form of Mössbauer spectra of ordered alloys	83
4.8. Structure of Mössbauer spectra of multilayer superlattices of type $\{A_m/B_n\}_k$	86
4.9. On the possibilities of examining the character of distribution of interstitial impurities	88

CHAPTER 5

MÖSSBAUER STUDIES OF THE ATOMIC AND MAGNETIC STRUCTURE OF ALLOYS

5.1. Investigation of the long-range atomic order in substitution alloys	91
5.2. Examples of investigation of the short-range order. Interatomic correlations, local atomic structure, non-ideal solid solutions	109
5.3. Examination of the magnetic structure of alloys	124
5.3.1. <i>Iron-based solid solutions</i>	124
5.3.2. <i>Concentrated alloys. Ferromagnetics, antiferromagnetics, non-collinear spin structures</i>	133
5.3.3. <i>Interlayer boundaries in $\{A_m/B_n\}_k$ superlattices</i>	141

CHAPTER 6

MÖSSBAUER SPECTROSCOPY OF ION-DOPED METALS AND ALLOYS

6.1. Mössbauer effect as the method of investigation of ion-doped materials	147
6.2. Effect of radiation defects on the parameters of the rigidity of interatomic bonds	150
6.3. Localisation and mobility of implanted atoms. The structure and stability of formed radiation defects	151
6.4. Variation of the composition of the surface layer of multi-component targets	158
6.5. Formation and dissolution of phases, amorphisation	160
6.6. Ion-induced martensitic transformation	166
6.7. Ion mixing	169
6.8. Long-range effects in ion bombardment	171
6.9. Conclusions	178

APPENDIX 1

METHODS OF MÖSSBAUER SPECTRA 'DECODING'

A.1.1. Determination of the parameters of physical models	181
A.1.2. Evaluation of errors and correlation coefficients	187
A.1.3. Methods of restoration of the functions of density of the distribution of parameters of hyperfine interaction	188
A.1.4. The method of difference spectra	199

APPENDIX 2

LINEAR ILL-POSED PROBLEMS. INVERSE PROBLEMS OF SPECTROSCOPY

A.2.1. Linear ill-posed problems	204
A.2.2. Inverse problems of spectroscopy	209
A.2.3. inconsistency of some 'obvious' approaches to solving inverse problems	211

A.2.4. The non-classical approach to the restoration of relationships	214
A.2.5. Distribution of χ_2	216
A.2.6. Concept of regularisation	217

APPENDIX 3

**RELATIONSHIP OF THE PARAMETER OF PAIR CORRELATION
WITH THE MEAN EFFECTIVE SIZE OF THE ANTIPHASE**

DOMAIN	221
REFERENCES	227
INDEX	245
