

The background of the cover features a complex molecular structure. It consists of a network of interconnected spheres (atoms) and lines (bonds). The spheres are colored in shades of red, black, and light grey. The structure is dense and three-dimensional, with some parts appearing more prominent than others. The overall appearance is that of a crystalline or polymeric material.

Contents

1. Introduction	1
1.1 Important Features in Polysaccharides	1
1.2 Concept in Synthesis of Polysaccharides	4
2. General Scope for Enzymatic Tools in Engineering of Polysaccharide Materials	9
2.1 Characteristic Features of Enzymatic Reactions for Synthesis of Polysaccharides	9
2.2 Synthesis of Polysaccharides Catalyzed by Hydrolases	13
2.3 Synthesis of Polysaccharides Catalyzed by Sucrase-Type Enzymes	16
3. Phosphorylase-Catalyzed Enzymatic Glycosylation	21
3.1 Fundamental Features of Phosphorylases	21
3.2 Outlines of Phosphorylase Catalyses	23
3.3 Phosphorylase-Catalyzed Glycosylation	30
4. Phosphorylase-Catalyzed Enzymatic Polymerization	43
4.1 Outlines of Phosphorylase-Catalyzed Polymerization	43
4.2 Thermostable Phosphorylase Catalysis	44
4.3 Practical Applications of Phosphorylase-Catalyzed Polymerization	45
5. Chemoenzymatic Synthesis of Amylose-Grafted Synthetic Polymers by Utilizing Phosphorylase Catalysis	51
5.1 Outlines of Chemoenzymatic Synthesis of Amylose-Grafted Synthetic Polymers by Utilizing Phosphorylase Catalysis	51
5.2 General Chemical Reactions to Link Maltooligosaccharide to Polymer Backbones or Polymerizable Groups	53

5.3	Chemoenzymatic Synthesis of Amylose-Grafted Polystyrene	55
5.4	Chemoenzymatic Synthesis of Amylose-Grafted Polyacetylene	56
5.5	Chemoenzymatic Synthesis of Amylose-Grafted Poly(Vinyl Alcohol)	59
5.6	Chemoenzymatic Synthesis of Amylose-Grafted Polydimethylsiloxane	61
5.7	Chemoenzymatic Synthesis of Amylose-Grafted Silica Gel	63
6.	Chemoenzymatic Synthesis of Amylose-Grafted Biopolymers by Utilizing Phosphorylase Catalysis	69
6.1	Outlines of Chemoenzymatic Synthesis of Amylose-Grafted Biopolymers by Utilizing Phosphorylase Catalysis	69
6.2	Chemoenzymatic Synthesis of Amylose-Grafted Chitin and Chitosan	70
6.3	Chemoenzymatic Synthesis of Amylose-Grafted Cellulose	72
6.4	Chemoenzymatic Synthesis of Amylose-Grafted Anionic Polysaccharides	75
6.5	Chemoenzymatic Synthesis of Amylose-Grafted Polypeptide	77
7.	Preparation of Amylose–Polymer Inclusion Complexes in Phosphorylase-Catalyzed Enzymatic Polymerization (“Vine-Twining Polymerization”)	81
7.1	Outlines of Vine-Twining Polymerization	81
7.2	Preparation of Amylose–Poly(Tetrahydrofuran) Inclusion Complex	82
7.3	Preparation of Inclusion Complex Using Other Polyethers as Guest Polymers	88
7.4	Preparation of Amylose–Polyester Inclusion Complexes	89
7.5	Preparation of Amylose–Polycarbonate Inclusion Complexes	91

8. Extension of Vine-Twining Polymerization by Phosphorylase Catalysis	97
8.1 Selective Inclusion of Amylose in Vine-Twining Polymerization	97
8.1.1 Amylose Selectively Includes One from Mixtures of Two Resemblant Guest Polymers	97
8.1.2 Amylose Selectively Includes a Specific Range of Molecular Weights in Polymers	100
8.1.3 Amylose Recognizes Chirality in Poly(Lactide)s	104
8.2 Preparation of Inclusion Complexes Composed of Amylose and Strongly Hydrophobic Polyesters in Parallel Enzymatic Polymerization System	107
8.3 Preparation of Hydrogels through the Formation of Inclusion Complex of Amylose	109
9. Carbohydrate Engineering by Phosphorylase Catalysis	113
9.1 Facile Synthesis of Glc-1-P from Starch by <i>Thermus Caldophilus</i> GK24 Phosphorylase	113
9.2 Amylose Production by Combined Use of Phosphorylase with Other Phosphorylases	113
9.3 Synthesis of Branched Glucan by Combined Use of Phosphorylase with Branching Enzyme	115
10. Preparation of Amylose-Based Nanomaterials by Phosphorylase Catalysis	119
10.1 Outlines of Nanomaterials Produced by Self-Assembly or Complex Formation of Macromolecules	119
10.2 Phosphorylase-Catalyzed Synthesis and Molecular Assembly of Amylosic Block Copolymers	120
10.3 Formation of Amylose-Lipid Complexes through Phosphorylase-Catalyzed Polymerization	123
<i>Index</i>	129
