NEW ECONOMY: INNOVATION INSIGHT INTO RUSSIA

This informational and analytic publication deals with topical problems concerning the transition of the Russian economy to the innovational path of development and the forming of a unified national innovational system.

Members of the legislative bodies, heads of ministries and agencies, leaders of administrations of Russian regions, renowned scientists, and businesspeople wrote their articles for this book, reflecting the entire large-scale innovational landscape of the national economy, identifying problems of the implementation of the scientific and technical policy, and describing the current status and prospects of legal, organizational and human-resource support of innovation activity.

The book offers valuable experience of practical activity aimed at economic modernization of the nation. It will become a useful data source for a wide circle of managers and specialists that participate in the forming of Russia's innovation economy.

The digest of the publication includes translations of its selected articles providing insight into key issues concerning the innovational development of the Russian economy covered in the publication. The digest includes a special section formed as a catalog representing examples of successful application of innovations by Russian companies, mostly small and medium ones.
