Studies on History

St. Petersburg - 1997

K.A. Langue. Physiological Sciences in Russia (19 - 20 Centuries).
Studies on History. St.Petersburg, 1997. 144 p.

Readers are introduced to the research of the first Russian scientists who have laid the groundwork for the development of Experimental Physiology, to the activities and the scientific heritage of physiologists who have founded great scientific schools in the 19th - early 20th century. The characteristic features of progress of Russian Physiology in the 20th century under science politization conditions and dramatic chapters of its history are described. I.P. Pavlov Russian (All-Union) Physiological Society's role in the stable and successive development of traditional and priority branches of Physiological sciences is shown. The concise exposition of the main trends of scientific works of Russian physiologists before the XXXIII International Congress of Physiological Sciences in St.Petersburg is included in studies.
