# Contents

|  |      |
|--|------|
| Foreword .....   | xi   |
| Preface.....   | xv   |
| Author .....   | xvii |
| <br>   |      |
| <b>Chapter 1</b> Introduction to LC-NMR .....                    | 1    |
| 1.1    Historical Review .....                                   | 1    |
| 1.2    Flow and NMR .....  | 9    |
| 1.3    Setting Up the LC-NMR System.....                         | 11   |
| 1.3.1    Continuous-Flow Mode.....                               | 12   |
| 1.3.2    Direct Stopped-Flow Mode.....                           | 12   |
| 1.3.3    Storage Mode .....                                      | 13   |
| 1.3.4    Calibrating the System .....                            | 13   |
| 1.3.5    Preparation of a Solid-Phase Extraction System.....     | 16   |
| 1.3.6    Adding More Sample to a Cartridge .....                 | 18   |
| 1.4    Solvent Requirements in LC-NMR .....                      | 19   |
| 1.5    Solvent Suppression and Referencing.....                  | 20   |
| 1.6    The Deuterium Lock .....                                  | 22   |
| 1.7    The Solvent-Gradient Ramp.....                            | 22   |
| 1.8    Diffusion.....  | 23   |
| 1.9    Shimming .....  | 23   |
| 1.10    Acquisition Parameters.....                              | 24   |
| 1.11    Chemical-Shift Tracking .....                            | 24   |
| 1.12    Other Considerations .....                               | 26   |
| 1.13    Sources of Error.....                                    | 27   |
| 1.14    Summary .....  | 28   |
| References .....   | 29   |
| <br>   |      |
| <b>Chapter 2</b> NMR Theory .....                                | 35   |
| 2.1    Magnetic Properties of Nuclei.....                        | 35   |
| 2.2    Data Acquisition .....                                    | 39   |
| 2.3    Relaxation of Nuclei .....                                | 41   |
| 2.3.1    Spin-Lattice Relaxation Time $T_1$ (Longitudinal) ..... | 42   |
| 2.3.1.1    Relaxation and Molecular Motion .....                 | 43   |
| 2.3.1.2    Dipole-Dipole Interaction “Through<br>Space” .....    | 43   |
| 2.3.1.3    Paramagnetic Relaxation .....                         | 45   |
| 2.3.1.4    Chemical Shift Anisotropy Relaxation.....             | 46   |
| 2.3.1.5    Scalar-Coupling Relaxation.....                       | 47   |
| 2.3.1.6    Electric Quadrupolar Relaxation.....                  | 47   |

|                  |   |     |
|------------------|---|-----|
| 2.3.1.7          | Spin Rotation .....   | 47  |
| 2.3.2            | Spin-Spin Relaxation Time $T_2$ (Transverse) .....                | 47  |
| 2.4              | The Chemical Shift .....  | 49  |
| 2.5              | Spin Coupling .....   | 51  |
| 2.6              | Nuclear Overhauser Effect (NOE).....                              | 56  |
| 2.6.1            | Molecular Weight and Maximum NOE .....                            | 57  |
| 2.6.2            | Time Dependence of NOE: Mixing Times .....                        | 59  |
| 2.7              | Coupling of HPLC with NMR .....                                   | 61  |
|                  | References .....  | 66  |
| <b>Chapter 3</b> | Separation Methods.....   | 69  |
| 3.1              | Modes of Separation.....  | 69  |
| 3.2              | General Method Development Strategies.....                        | 74  |
| 3.3              | Column Packing Types.....   | 78  |
| 3.4              | Detector Selection .....  | 79  |
| 3.5              | RPC Method Development and Compatibility with NMR .....           | 83  |
| 3.6              | Integration of CE and NMR.....                                    | 84  |
| 3.7              | Transitioning from Analytical to Preparative Chromatography ..... | 85  |
| 3.8              | General Considerations .....                                      | 87  |
|                  | References .....  | 89  |
| <b>Chapter 4</b> | NMR Instrumentation and Probe Technologies.....                   | 91  |
| 4.1              | Instrumentation Configuration .....                               | 91  |
| 4.2              | The Magnet.....   | 94  |
| 4.3              | Room Temperature Flow Probe.....                                  | 96  |
| 4.4              | Microcapillary Probes (Room Temperature) .....                    | 97  |
| 4.4.1            | Microcoil Capillary Flow Probes (Room Temperature).....           | 97  |
| 4.4.2            | Microcoil Tube Probes (Room Temperature).....                     | 101 |
| 4.5              | Cryogenically Cooled Probes .....                                 | 102 |
| 4.5.1            | Cryoflow Probe.....   | 103 |
| 4.5.2            | Cryocapillary Tube Probe .....                                    | 104 |
| 4.5.3            | Affordable Cryogenically Cooled Probes .....                      | 106 |
| 4.6              | Probe Coil Geometries .....                                       | 107 |
| 4.7              | Probe Sensitivity Comparison .....                                | 108 |
|                  | References .....  | 112 |
| <b>Chapter 5</b> | NMR-Associated Isolation Technologies .....                       | 115 |
| 5.1              | Stopped Flow .....  | 115 |
| 5.2              | Loop Collector.....   | 116 |
| 5.3              | Solid-Phase Extraction (SPE) .....                                | 117 |
| 5.4              | Nonchromatographic Flow NMR.....                                  | 121 |

|                  |  |            |
|------------------|--|------------|
| 5.5              | Direct-Injection NMR (DI-NMR) .....  | 123        |
| 5.5.1            | Applications of DI-NMR.....  | 125        |
| 5.5.2            | Comparisons.....   | 128        |
| 5.6              | Capillary Electrophoresis and NMR .....                                      | 128        |
| 5.6.1            | Modes of Electrophoresis-NMR and Effects on<br>NMR Spectral Properties ..... | 128        |
| 5.6.2            | NMR Observe Volume .....   | 130        |
| 5.6.3            | Capillary Electrochromatography (CEC)-NMR.....                               | 132        |
| 5.6.4            | CE-NMR in Practice .....   | 133        |
|                  | References .....   | 135        |
| <b>Chapter 6</b> | <b>NMR Experiments .....</b>   | <b>141</b> |
| 6.1              | Solvent Suppression.....   | 141        |
| 6.2              | Structure Elucidation Experiments .....                                      | 142        |
| 6.2.1            | Heteronuclear Correlation Experiments (HSQC,<br>HMQC, HMBC).....             | 144        |
| 6.2.2            | WET Solvent Suppression and 2-D NMR.....                                     | 147        |
| 6.2.3            | Decoupling and Power Levels in 2-D NMR .....                                 | 148        |
| 6.3              | NOE Experiments.....   | 150        |
| 6.3.1            | Sample Considerations .....  | 154        |
| 6.3.2            | Processing (NOESY and ROESY) 2-D Spectra .....                               | 155        |
| 6.3.3            | Chemical/Conformational Exchange .....                                       | 156        |
| 6.3.4            | Spin Diffusion (Problematic for Large Molecules)..                           | 157        |
| 6.3.5            | NOE, Conformational Analysis, and Distance<br>Determination.....             | 157        |
| 6.3.6            | ROESY—Quantitative Distance Determination .....                              | 162        |
|                  | References .....   | 162        |
| <b>Chapter 7</b> | <b>Applications.....</b>   | <b>165</b> |
| 7.1              | Degradation Products .....   | 165        |
| 7.2              | Impurities.....  | 171        |
| 7.3              | Trace Analysis .....   | 178        |
| 7.4              | Analysis of Mixtures .....   | 180        |
| 7.5              | Tautomer Kinetics .....  | 184        |
| 7.6              | Unstable Products .....  | 186        |
| 7.7              | Metabolites .....  | 188        |
| 7.8              | CE Isolates.....   | 195        |
| 7.9              | Natural Products.....  | 201        |
| 7.10             | Proteins/Peptides .....  | 209        |
|                  | References .....   | 217        |
| <b>Chapter 8</b> | <b>Other Specialized-Flow NMR .....</b>                                      | <b>225</b> |
| 8.1              | NMR and Parallel Detection .....   | 225        |

|        |  |     |
|--------|--|-----|
| 8.2    | Data Processing and Deconvolution of Parallel Data.....  | 226 |
| 8.3    | Parallel Probe Construction.....                         | 228 |
| 8.3.1  | Multiplex Four-Coil Probe .....                          | 228 |
| 8.3.2  | Multiplex Dual Probe .....                               | 231 |
| 8.4    | Microprobes.....   | 232 |
| 8.5    | Advancements in Multiple-Coil Probe Design.....          | 233 |
| 8.6    | Biological Screening and Flow NMR .....                  | 236 |
| 8.7    | NMR and Microreactors .....                              | 244 |
| 8.8    | Signal-to-Noise Ratio (Microcoils) .....                 | 245 |
| 8.9    | Microprobe Design (Microcoil/Microslot/Microstrip) ..... | 250 |
| 8.10   | Future Directions.....                                   | 253 |
| 8.10.1 | Portable NMR and Sensitivity .....                       | 253 |
| 8.10.2 | DNP and NMR Sensitivity .....                            | 254 |
| 8.11   | Summary .....  | 254 |
|        | References .....   | 255 |
|        | <b>Glossary</b> .....                                    | 261 |
|        | <b>Index</b> .....                                       | 279 |
