Nanoscience

Volume 1: Nanostructures through Chemistry

A Review of Recent Literature

Fditor

Paul O'Brien, University of Manchester, UK

Authors

Victoria S Coker, University of Manchester, UK **Serena A. Corr**, University of Kent, UK

Mark Green, King's College London, UK

Sarah Haigh, University of Manchester, UK

Hiroaki Imai, Keio University, Japan

lan A Kinloch, University of Manchester, UK

Gerrit van der Laan, University of Manchester, UK and Diamond Light Source, UK

Jonathan R Lloyd, University of Manchester, UK

Mohammad Azad Malik, University of Manchester, UK

Ammu Mathew, Indian Institute of Technology Madras, India

Philip Moriarty, University of Nottingham, UK

Yuya Oaki, Keio University, Japan

Daniel Ortega, University College London, UK

Quentin A. Pankhurst, University College London, UK and The Royal Institution of Great Britain

Arunkumar Panneerselvam, King's College London, UK

Richard A D Pattrick, University of Manchester, UK

Carolyn I Pearce, Pacific and Northwest National Laboratory, USA

T. Pradeep, Indian Institute of Technology Madras, India

Karthik Ramasamy, University of Alabama, USA

Neerish Revaprasadu, University of Zululand, South Africa

Anirban Som, Indian Institute of Technology Madras, India

N. D. Telling, Keele University, UK

Paulrajpillai Lourdu Xavier, Indian Institute of Technology Madras, India **Robert J Young**, University of Manchester, UK

CONTENTS

Cover

The cover image shows a model of molecules of water being channelled through a single-walled carbon nanotube.

| Preface | | |
|--------------|--|--|
| Paul O'Brien | | |

| Recent advances in mesocrystals and their related structures | | 1 | |
|--------------------------------------------------------------|------|---------------------------------------------------------------|----|
| Yu. | ya C | Daki and Hiroaki Imai | |
| | 1 | Introduction to mesocrystals and nonclassical crystallization | 1 |
| | 2 | Mesocrystals and their related structures | 3 |
| | 3 | Recent development and application of mesocrystals | 17 |
| | 4 | Conclusions and outlook | 24 |
| | Ac | cknowledgement | 25 |
| | Re | eferences | 25 |

| Nanomaterials for solar energy | | 29 |
|--------------------------------|------------------------------------------|----|
| Mohan | nmad Azad Malik, Neerish Revaprasadu and | |
| Karthik | c Ramasamy | |
| 1 | Introduction | 29 |
| 2 | Ternary and quaternary materials | 30 |
| 3 | Binary materials | 36 |
| 4 | Conclusion | 56 |
| Re | eferences | 56 |

| Magne | tic hyperthermia | 60 |
|---------|----------------------------------------------------------------------------------------------------------|----------|
| Daniel | Ortega and Quentin A. Pankhurst | |
| 1 | Introduction | 60 |
| 2 | Physical principles of magnetic hyperthermia | 63 |
| 3 | Biocompatible magnetic colloids for hyperthermia | 74 |
| 4 | Clinical trials: recent case studies | 80 |
| 5 | Conclusions | 84 |
| Re | eferences | 85 |
| | | |
| | developments in transmission electron microscopy and their tion for nanoparticle characterisation | 89 |
| Sarah . | Haigh | |
| 1 | Aberration corrected transmission electron microscopy | 89 |
| 2 | Exit wavefunction restoration | 90 |
| 3 | Chromatic aberration correction | 90 |
| 4 | Electron energy loss spectroscopy | 92 |
| 5 | Energy dispersive x-ray spectroscopy (EDXS) | 94 |
| 6 | Specimen preparation | 96 |
| 7 | Three dimensional TEM tomography | 97 |
| 8 | Conclusions eferences | 98 99 |
| | | |
| Extrac | ellular bacterial production of doped magnetite nanoparticles | 102 |
| | d A D Pattrick, Victoria S Coker, Carolyn I Pearce, Telling, Gerrit van der Laan and Jonathan R Lloyd | |
| 1 | Introduction | 102 |
| 2 | Exploiting extracellular biogenic magnetite | 105 |
| 3 | Metal doped magnetites | 105 |
| 4 | X-ray magnetic circular dichroism (XMCD) | 107 |
| 5 | Vanadium biomagnetite | 108 |
| 6 | Bionanomagnetite in textile wastewater treatment | 110 |
| 7 | Conclusions | 112 |
| | cknowledgements | 112 |
| K | eferences | 113 |
| | technology and beyond: manipulating matter using scanning | 116 |
| robes | | |
| - | Moriarty | |
| 1 | Introduction | 116 |
| 2 | A potted history of advances in (ultra)high resolution SPM | 117 |
| | | |

| 3 Plucking, positioning, and perturbing atoms at silicon | |
|------------------------------------------------------------------------------------------------------------------|------------|
| surfaces 4 Visualising (intra)molecular force-fields and submolecular | |
| structure 5 'Dialling in' dirac fermions and addressing atomic | spins 137 |
| 6 The trouble with tips (reprise) | 139 |
| 7 Conclusions | 141 |
| Acknowledgements | |
| References | 141 141 |
| | |
| Graphene and graphene-based nanocomposites | 145 |
| Robert J Young and Ian A Kinloch | |
| 1 Introduction | 145 |
| 2 Graphene | 146 |
| 3 Graphene oxide | 153 |
| 4 Nanocomposites | 158 |
| 5 Functional nanocomposites | 169 |
| 6 Conclusions and prospects | 171 |
| References | 171 |
| Metal oxide nanoparticles Serena A Corr | 180 |
| | 180 |
| | 180 |
| 2 Recent synthetic developments 3 Case study of advances in characterisation: BaTiC | |
| nanoparticles | 73 202 |
| 4 Concluding remarks | 204 |
| References | 205 |
| References | 203 |
| Recent advances in quantum dot synthesis | 208 |
| Arunkumar Panneerselvam and Mark Green | |
| Introduction | 208 |
| II-VI chalcogenides | 209 |
| Transition metal chalcogenides | |
| Copper chalcogenides | 218 |
| IV-VI chalcogenides | 223 |
| Ternary materials | 228 |
| Copper-based multicomponent chalcogenides | 232 |

| Phosphide and arsenide – containing quantum dots Acknowledgements References | | 235 239 239 |
|------------------------------------------------------------------------------|-----------------------------------------------------|-------------------|
| Nanosc | ience in India: a perspective | 244 |
| Anirba | n Som, Ammu Mathew, Paulrajpillai Lourdu Xavier and | |
| T. Prac | deep | |
| 1 | Introduction | 244 |
| 2 | Nanoscience research in India | 246 |
| 3 | Applications of nanomaterials | 260 |
| 4 | Nano-bio interface, nanomedicine and nanotoxicity | 266 |
| 5 | Nano and industry | 272 |
| 6 | Nano and education | 273 |
