#### **Notices**

Knowledge and best practice in this field are constantly changing. As new research and experience broaden our understanding, changes in research methods, professional practices, or medical treatment may become necessary.

Practitioners and researchers must always rely on their own experience and knowledge in evaluating and using any information, methods, compounds, or experiments described herein. In using such information or methods they should be mindful of their own safety and the safety of others, including parties for whom they have a professional responsibility.

To the fullest extent of the law, neither the Publisher nor the authors, contributors, or editors, assume any liability for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions, or ideas contained in the material herein.

# Contents

<i>Introduction</i>	<i>vii</i>
<b>1. Toxicity of thallium and its compounds</b>	<b>1</b>
List of abbreviations	1
1.1 Thallium and its compounds: chemical and toxic properties, distribution, and release into the environment	1
1.2 Thallium toxicity to biological organisms (humans, animals, and plants)	7
1.3 Classification, symptomatology, diagnosis, and treatment of thallium poisoning	15
1.4 Methods of thallium analysis in biological samples	32
References	33
<b>2. Toxicology of thallium</b>	<b>53</b>
List of abbreviations	53
2.1 The toxic effect of thallium on the human body and animals	53
2.2 The toxic effect of thallium compounds on body systems	59
2.3 Toxic effects of thallium on aquatic protozoa and unicellular organisms	66
References	68
<b>3. Toxic thallium effects on cells</b>	<b>79</b>
List of abbreviations	79
3.1 Molecular mechanisms of thallium transport across cell membranes: use of isotopes and ion channel inhibitors	79
3.2 Thallium toxicity mechanisms on mammalian cells	84
3.3 Interaction of $Tl^+$ and $Tl^{3+}$ with molecular thiol groups	91
References	93
<b>4. Effect of thallium on mitochondria</b>	<b>107</b>
List of abbreviations	107
4.1 Heavy metal effects on isolated mitochondria	108
4.2 Effect of thallium on the inner membrane potential and ion permeability and the mitochondrial respiration	112

4.3	Thallium effects on the concentration of free thiol groups in mitochondrial proteins	138
4.4	Tl <sup>+</sup> induces the opening of the mitochondrial permeability transition pore in the inner membrane of calcium-loaded mitochondria: The effects of the pore inhibitors	144
4.5	The role of calcium sites and potassium channels of the inner membrane in the Tl <sup>+</sup> -induced MPTP opening	179
4.6	The dependence of the Tl <sup>+</sup> -induced MPTP opening in the inner membrane of rat liver mitochondria on the adenine nucleotide translocase conformation and the phosphate symporter state	199
4.7	Concluding remarks	236
	Acknowledgments	239
	References	239
	<i>Index</i>	261
