THESES

OF SYMPOSIUM WITH INTERNATIONAL PARTICIPATION
"CURRENT PROBLEMS OF CLINICAL AND EXPERIMENTAL
PSYCHONEUROIMMUNOLOGY"

VOLUME II

RUSSIA-TOMSK, DECEMBER 8-10, 1992

EDITORIAL:

Professor O. Vasiljeva (Editor-in-Chief); academician of RANSci, professor V. Kozlov (Vice Editor-in-Chief); associate of RANSci, professor V. Semke; professor B. Polozhy; D. Sci. V. Abramov; Ph. D. L. Stepanova (Secretary); I. Zelenskaya (Technical Secretary).

This issue represented theses of Symposium with international participation "Current Problems of Clinical and Experimental Psychoneuroimmunology" held in Tomsk on December 8-9, 1992. All materials represent resume of Plenary Lectures and three Topics: "Mechanisms of normal and pathological neuroimmunological interactions"; "Ecological immunopathology, stress and mental health"; "Clinical Immunopathology and immunocorrection in major neuropsychiatric diseases".

This issue consists of two volumes: the first is in Russian and the second is in English. It may be of interest for scientists and physicians.
